ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS REPORT IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

According to statements by a Soviet officer, it appears that the USSR has developed a new short-range defense combat plane for crewless operation. Because of its short length, stated to be seven meters, it is easy to transport. To the question whether a starting ramp was required, and the plane therefore tied to bases, the officer answered that it would take off from a launching carriage. It has a tail assembly like the MiG 15 and delta wings. It is powered by a rocket engine, and in addition has a ram jet pipe astern.
